

# ASSEMBLY INSTRUCTIONS

## Harley-Davidson M8 Softail Gas Tank Cover And Console Kit "Avenger" 2018-2022

**GTC-M8STB**

For questions pertaining to the installation of this product, please contact our Killer Custom technical department at [info@killercustom.com](mailto:info@killercustom.com). This product is manufactured in Europe by Killer Custom

**NOTE:** Killer Custom assumes no responsibility or liability for damage or injury of any kind arising out of the use or misuse of any products.

1. Check all clearances before, during, and after installation.
2. Put both sides of the Tank Cover and the Console on the tank to check the fitment. The kit is designed to use a standard gas tank cap, but you may need to adjust the cap hole size on the console and the sides if you are using a different one.
3. We recommend using car glass sealant/glue to fix the covers. A little bit of sanding the tank surface would help to increase the adhesiveness. Degrease the tank surface before gluing. Follow the instructions of the sealant/glue manufacturer. First, glue the side covers of the tank and let them completely dry. Apply the paint job at this point. Also, paint the console.
4. The last step is attaching the console. There are two options: you can use the double-sided adhesive tape or use car glass sealant/glue. Use the masking tape to protect the painted surfaces before applying the glue. Let the glue dry completely according to the manufacturer's recommendations, and the installation is finished.
5. After the installations, test drive the bike to be sure everything is working perfectly.

### NOTE:

- Installation of this kit requires detailed knowledge of the motorcycle model and mechanics. It is assumed that the installer has access to the proper tools and a working knowledge of them and factory service manuals.
- Before the painting the parts first you have to put those on the motorcycle and make sure that everything is adjusted and fits perfectly.
- This kit is designed to use with the original shock absorbers, but for better look you may need to use the lowering kit or air ride suspension.
