

# ASSEMBLY INSTRUCTIONS

Indian Chief  
License Plate Bracket

LPB-IND-CH

For questions pertaining to the installation of this product, please contact our Killer Custom technical department at [info@killercustom.com](mailto:info@killercustom.com). This product is manufactured in Europe by Killer Custom

**NOTE:** Killer Custom assumes no responsibility or liability for damage or injury of any kind arising out of the use or misuse of any products.

1. Check all clearances before, during and after installation.
2. Remove the OEM license plate holder from your motorcycle. Note that you have to rebuild the license plate lightning wiring.
3. Raise the rear of the motorcycle enough to take the rear axle out. Make sure the motorcycle won't fall during all operations.

4. Take out the rear axle according to the Indian Motorcycles factory manuals. If not assembled please attach the spacer / holder to the bracket first, then put your new license plate bracket on your motorcycle as shown on the diagram below. The original rear spacer is replaced.

5. Use the thread locker glue (not included) for all treaded connections.
6. Assemble the rear axle according to the Indian Motorcycles factory manuals.
7. After the installation make a test drive to be sure everything is working perfectly.

**NOTE:**

Installation of this kit requires detailed knowledge of the motorcycle model and mechanics. It is assumed that the installer has access to the proper tools and a working knowledge of them, and factory service manuals.
